**3 Stocks to Plug into the
Power Gauge Right Now**

3 Stocks to Plug into the Power Gauge Right Now

SPECIAL REPORT

BY MARC CHAIKIN

Welcome to the Power Gauge.

[You can access it here](#), if you haven't already.

Simply type in any of 4,000 different tickers and see exactly where the stock is most likely to go next. A chance to predict TOMORROW's stock ratings on Wall Street... in any type of market.

In a nutshell, here's how it works:

- If the Power Gauge rates the stock "**BULLISH**," then the stock has a strong chance of shooting up in the coming weeks and months.
- If the Power Gauge rates the stock "**NEUTRAL**," then the stock has a strong chance of drifting sideways in the coming weeks and months.
- If the Power Gauge rates the stock "**BEARISH**," then the stock has a strong chance of plummeting in the coming weeks and months.

The Power Gauge is the culmination of my 50 years on Wall Street. It has pointed to a variety of winners... using a secret of the investment world I cover in [our special video series here](#).

Take a look...

Here's just a snapshot of the gains our system has pointed to...

- **10,090% in 11 months** on RIOT
- **3,060% in 9 months** on VXRT

- **3,000% in 3 months** on GME
- **1,900% in 18 months** on RAD
- **1,050% in 4 months** on OSTK
- **900%** on AAPL
- **884% in 8+ months** on NIO
- **799% in 9+ months** on FLGT
- **789% in 8 months** on APPS
- **788% max gain in 24 hours** on PCLN
- **697%** on LAM
- **530%** on CROX
- **410%** on ENTG
- **399%** on PEGA
- **383% in 10 months** on VIAC
- **335% in 2 months** on NVAX
- **277%** on NOVT
- **258% in 6 months** on CPRI
- **256%** on KBH
- **244% in 2 months** on CGIX
- **238% in 6 months** on DISC
- **227%** on CMG
- **136% gain in 8 months** on YY

In short, I'm best known as the creator of one of Wall Street's most popular indicators... a system that appears in every Bloomberg and Reuters terminal in the world, and is now used by hundreds of banks, hedge funds, and every major brokerage site.

For decades, I used it to help banks grow wealthier.

But then the Crash of 2008 came along...

And something happened that rubbed me the wrong way.

My wife lost around 50% of her 401(k)... all because of a bad money manager.

I thought... "Gee, I've spent my whole life helping Wall Street get richer... when ordinary folks like my wife Sandy are getting fleeced."

And that's when I made a radical decision that yanked me out of retirement and has kept me working 24/7 for the last decade now... creating what I consider the ultimate "secret power" for everyday people.

A way to see which stocks could soon double your money, by taking the same information I gave Wall Street for 50 years... and using it to give yourself a *HUGE* and "unfair" advantage.

Until May 25, I'm giving you a "lite" version of the Power Gauge to try this yourself on as many stocks as you like.

Here are 3 stocks to get you started...

STOCK #1: TECNOGLASS (TGLS)

Type this stock into the Power Gauge right now...

And you'll see the rating is listed as BULLISH.

Tecnoglass is a little-known architectural glass maker that has been benefitting from the ongoing housing boom.

The stock recently shot up 30% after reporting strong 1st quarter earnings.

But I think that's only the beginning.

According to the Power Gauge, this stock could soon be rated a "Buy" at every major bank and hedge fund...

which means this company is likely to shoot up in the coming weeks and months.

Because the fact is, nothing makes a stock go UP or DOWN – faster – than the actions of institutional investors.

When a bank starts pouring in hundreds of millions of dollars into a stock, it can shoot up overnight and go on to rise hundreds... or even thousands of percent... all because of the sheer quantity of institutional money flowing in.

On May 25th, I'll explain exactly how the Power Gauge works to predict these huge stock moves in our special event, *Prediction 2021*.

STOCK #2: EXPEDIA GROUP (EXPE)

Type this stock into the Power Gauge right now...

And you'll see the rating is listed as NEUTRAL.

Expedia Group is an online travel company. To some people, it seems like a fantastic stock idea right now... a play on America's "reopening."

After all, people are beginning to eat out in restaurants again, visit with family and take vacations.

But according to the Power Gauge, this stock is headed nowhere.

In fact, the Power Gauge is threatening to turn Bearish on the stock any day now.

Expedia is a good example of how the Power Gauge can identify "popular" stock ideas... and expose them as money traps.

That's how I once warned the public to avoid the beloved fast-food firm Chipotle before it fell as much as 41%.

STOCK #3: PELOTON INTERACTIVE (PTON)

Type this stock into the Power Gauge right now...

And you'll see the rating is listed as BEARISH.

Peloton is an exercise-bike company.

Last year, it was a classic "pandemic play." Gyms were closed and people were buying expensive exercise bikes for home use.

But the Power Gauge turned bearish on Peloton back in mid-February and the stock has been falling ever since.

And I think that's only the beginning.

According to the Power Gauge, this stock could soon be rated a "Sell" at every major bank and hedge fund... which means this company is likely to become one of the biggest losers of 2021.

In fact, the company just got hit with a huge recall of their treadmills.

This – coupled with the fact that investors are now pivoting from "pandemic plays" to "reopening plays" – means that you should AVOID Peloton right now. If you own it, get out immediately.

Finding bearish stocks is how I once appeared on CNBC *Fast Money* back in 2014 and warned the public about Priceline.com, just before the stock plummeted. A friend of mine reported seeing a 733% *overnight* gain on a single play he came across, by using my prediction.

OUR SPECIAL EVENT ON MAY 25

In our *Prediction 2021* event on Tuesday, May 25 at 8pm ET, I'll walk you through how the Power Gauge works.

I'll give away my #1 little stock to buy now, for 500% potential upside...

And most important of all, I'll make the biggest prediction of my 50-year career.

I'll name a new type of company I predict will soon *create a paradigm shift in U.S. business* that could make you 5 to 10 times your money.

It'll change the way you eat, shop, work, talk, and more. A once-in-a-generation investment opportunity.

I'll show you exactly how to play my prediction using the Power Gauge.

Last year alone, it pointed to Riot Blockchain before it shot up 10,090% in less than 12 months... Digital Turbine, before it shot up 789% in 8 months... Overstock.com, before it shot up 1,050% in 4 months... and more.

See you on May 25th.

Regards,

Marc Chaikin

Creator of *The Power Gauge*

ABOUT MARC CHAIKIN

[Click here for a "behind-the-scenes" look at how Marc Chaikin has become a legend of the U.S. finance world](#), and why Stansberry Research says his system "represents our core mission over the past 22 years."

Marc Chaikin has spent 50 years on Wall Street, where he survived and thrived in 9 bear markets... helped create three new indices for the Nasdaq, where he once rang the opening bell... has built what Stansberry considers the "golden standard" for determining where a stock is going next (based on his worldwide indicator which appears on every Bloomberg terminal)... and has appeared many times on *Fox Business* and CNBC's *Mad Money*.

As CNBC's *Mad Money* host, Jim Cramer, once said:

"I learned a long time ago not to be on the other side of a Chaikin trade.

I want to explain why I love Marc's stuff. It's simple, it's understandable, it's rational, it's not emotional, and I use it constantly and I almost never want to go against it."
